Phlebotomy Technician

▶ A phlebotomist is a professionally trained and certified person who works in a hospital, clinical laboratory, or health-care facility and obtains blood specimens from patients using a variety of intrusive procedures. In addition to technical, clerical, and interpersonal skills, the phlebotomist must develop strong organizational skills to handle a heavy workload efficiently and accurately.

Major duties and responsibilities of the phlebotomist include:

- ♥ Correct I.D. of the patient before collecting samples
- ♥ Collection of the appropriate amount of blood by Venipuncture or skin puncture
- ♥ Selection of the appropriate specimen containers
- ♥ Correct labeling of all specimens
- ♥ Appropriate transportation of specimens to the laboratory
- ♥ Effective interaction with patients and other personnel in the workplace

Florida Medical Prep's *Phlebotomy Technician* diploma program prepares individuals, under the supervision of nurses, phlebotomists and other health care professionals, to draw blood samples from patients using a variety of intrusive procedures. *Phlebotomy Technician* classes also teach you to collect and process other clinical specimens.

The course combines 35-hours classroom instruction with a 40-hours off-site clinical externship to provide students with a comprehensive learning experience. You will be instructed in basic vascular anatomy and physiology, blood physiology, skin puncture techniques, venipuncture, venous specimen collection and handling, safety and sanitation procedures, and applicable standards and regulations.

Upon completion of this program, you receive a diploma and will be prepared to take your national certification exam.

Home Health Aide (HHA)

▶ *Home Health Aides (HHAs)* go to a resident's home, or work in a residential facility, to deliver health care to the elderly, ill, or disabled. A home health aide typically works with residents who need more extensive physical/medical care than a typical family can provide. *HHAs* help their clients with everyday activities like getting out of bed, bathing, dressing, exercising and grooming.

The *Home Health Aide* 75-hour diploma program offered at Florida Medical Prep is one of the fastest growing fields in the country today. The *HHA* profession is expanding dramatically both locally and nationally with an abundance of well-paid opportunities for caring for the needs of the elderly, handicapped or those recovering from an illness or injury. As a home health aide you will visit client's homes to administer the personal care they need.

Florida Medical Prep's *Home Health Aide* program prepares students for employment as a home health aide. You will learn how to maintain bodily and emotional comfort and to assist the client toward independent living in a safe environment. Content areas include: legal and ethical responsibilities; communication skills; basic human needs; a safe, clean, and healthy home environment; human development; nutritional needs; emergency care; personal care; special care and rehabilitation needs of the client; household management; record-keeping; and employability skills.

In addition, comparisons between Home Health Aide and Nursing Assistant requirements in the state of Florida are made.

Established in 2003, Florida Medical Prep is the leader in healthcare provider education!

Florida Medical Prep is committed to your success in fulfilling a healthcare provider career. Each program is designed to motivate and guide you with the use of a specific core curriculum that keeps your attention and promotes a fun & highly effective learning experience.
